Skills

Docker, AWS, Azure Basics, Github Actions, Express, Postgres, TypeORM, FastAPI

React/NextJS, Tailwind, Framer Motion, Recharts, RadixUI, Ant Design

Professional Experience

Software Developer, Seldio Oy 🔗
Tykistökatu 4, Electrocity, 20520 Turku, Finland, (Freelance Contrtact)

- Worked on an application for Kiosk device in React and React Native
- Worked on CMS for Restaurant Management with modules including Products, Design Studio, Voucher Management, Inventory Management, etc.
- Handled deployments and CI/CD for NextJS and Strapi based applications.

Backend DevOps Associate, A5IT Capital 🔗
Crystal Lake Illinois, US, (Freelance Contract)

- Deploy and build CI pipelines for Express and NextJS apps (Postgres, Docker, Caddy, AWS).
- Develop and maintain backend services using Node.js and TypeScript.
- Design and implement RESTful APIs with the Express.js framework.
- Utilize Docker for containerization / deployment. and setup CI/CD pipelines.

DevOps Associate, Hyperce LLC 🔗
Aug 2023 – Feb 2024 Wilmington, Delaware, US, (Remote Full Time)

- Orchestrated AWS deployments on ECS, AppRunner, and EC2 platforms.
- Managed SES, S3, CloudFront, Route 53 and more AWS services for efficient solutions.
- Spearheaded CI/CD pipeline development for streamlined software delivery.
- Single handedly developed main company website using Next.js for optimal performance.
- Aided junior DevOps professional in a smooth transition and knowledge transfer.

Frontend Developer, Nest Nepal 🔗
Kathmandu, Nepal, (Onsite Full Time)

- Replicated Figma designs with responsive layouts.
- Implemented API calls using vanilla JavaScript for enhanced functionality.
- Setup GitHub Actions for FTP for continuous deployment to cPanel.

Projects

Invey, Survey Platform 🔗

- Building user intensive UI for a survey platform using NextJS, Tailwind and Framer Motion.
- Backend API Calls with Axios which is written in FastAPI. Helped in business descision making for the product.

Utarchadhav 🔗

- (WIP) Building a podcast website focusing on the creative side of the designs with NextJS and integrating API built in TS.
- Deployed and built CI/CD for both frontend (NextJS) and Backend (Typecript) in a Linux environment.

Saru's Archival 🔗

- Built the frontend of entire project in NextJS / Tailwind including a dashboard to feed the data integrating API built in TS.
- Used Ant Design components for building the dashboard with clean data which helped in maintaining data.
- Deployed the API on a Linux Server (linux vps, nvm for node, pm2 for processes, nginx for web server and certbot).

nepseCLI, Python, Typer, APIs 🔗

- Built a Command Line Interface application using Python and Typer framework.
- Working on providing users with the API for all the data in the project.

Newsletter API 🔗

- Flask & SQLAlchemy Newsletter API: Built a backend for subscriber management using popular frameworks.
- Dockerized & Deployed: Packaged and ran the API efficiently with Docker, showcasing deployment skills.

RashifalAPI, Python Flask, Requests- 2023 🔗

- Created an unofficial Rashifal (horoscope) API by fetching data from HamroPatro.
- Gained hands-on experience in deploying Flask applications to serve the API.

Nepal Oil Corporation API, - 2023 🔗

Built a Flask API that scrapes static data from NOC official website with bs4 and curates the data and serves in REST.

Education

Kathmandu, Nepal
NEB 12, Nobel Academy
Physics, Chemistry, Mathematics, Computer Science

Kathmandu, Nepal
SEE 10, Occidental Public School 🔗
Computer Science, Mathematics, Music
